

INDEPENDENT MUSIC RADIO

A platform for independent artists, listeners, sponsors and strategic investors.

DESCRIPTIVE BUSINESS & PARTNERSHIP OVERVIEW

1. Executive Summary

What VIX 94' is, what it is designed to become, and why the model can create value for multiple stakeholders.

VIX 94' is a digital independent music radio platform built around curated listening, music discovery and a distinct brand identity. Its core purpose is to give independent and emerging artists an additional place to be heard while creating a high-quality environment for listeners and commercial partners.

The platform is designed as a **music experience first**. Commercial opportunities can then be developed around that experience through sponsorships, artist campaigns, branded programming, content and cultural partnerships.

The longer-term opportunity is to develop VIX 94' from an online radio destination into a broader independent music and culture platform, with artists, content, partnerships and community forming the ecosystem.

Core proposition:

Give independent music a place to be discovered — and give brands a meaningful way to participate in the culture surrounding it.

2. The Market Problem

Three stakeholders face different but connected challenges.

Stakeholder	Current challenge	Opportunity VIX 94' addresses
Independent artists	Crowded social feeds, fragmented discovery and short release cycles.	Provide an additional curated channel for music discovery and repeat exposure.
Listeners	Algorithmic repetition and fragmented discovery across platforms.	Create a focused station with a recognizable identity and curated selection.
Sponsors / brands	Generic digital advertising can be intrusive and interchangeable.	Create cultural partnerships where the brand is associated with music and discovery.
Strategic investors	Music opportunities are fragmented across artists, content, media and events.	Build an ecosystem connecting these areas through a single recognizable platform.

VIX 94' does not attempt to replace major streaming platforms. Its positioning is complementary: a curated discovery layer and branded music environment with its own identity.

3. The VIX 94' Solution

The platform brings together **curation, continuous listening, artist discovery and commercial partnership** in one environment.

Layer	What it does	Stakeholder value
Radio / Player	Continuous digital listening experience.	Listeners receive a simple destination for music.
Music Library	Curated catalogue of selected tracks and artists.	Artists gain a route into discovery and rotation.

Layer	What it does	Stakeholder value
Artist Layer	Artist names, tracks and future artist-focused programming.	Creates visibility beyond a single release post.
Brand Layer	Sponsorships, partnerships and custom integrations.	Brands gain relevant cultural association.
Content Layer	Mixes, sessions, releases and future original formats.	Creates additional inventory and audience touchpoints.
Event / Culture Layer	Potential future activations, collaborations and live experiences.	Extends the brand beyond the website.

4. Artist Workflow

A simple operating workflow for onboarding and programming independent artists.

Step	Stage	Description
01	SUBMISSION	Artist submits track, artist information and relevant release details.
02	REVIEW	VIX 94' reviews the submission for fit, quality and programming suitability.
03	SELECTION	Selected music enters the catalogue / programming pool.
04	ROTATION	Track becomes available for curated station rotation.
05	DISCOVERY	Listeners encounter the artist through the VIX 94' listening experience.
06	AMPLIFICATION	Selected artists may become candidates for mixes, sessions, campaigns or future collaborations.

Artist principle: selection should remain curated. The objective is not simply to maximize the number of uploads; it is to protect the identity and listening quality of the station.

5. Independent Artist Proposition

VIX 94' can offer artists a platform that is focused on **discovery rather than vanity metrics**. The value proposition can develop as the audience and programming ecosystem grow.

Artist benefit	How it works	Potential future extension
Discovery	Selected music enters a curated station environment.	Artist spotlights, mixes and sessions.
Exposure	Artist and track become part of recurring programming.	Campaign support around selected releases.
Positioning	Association with a focused independent music brand.	Editorial / cultural features.
Catalogue life	Music can continue circulating after initial release activity.	Themed programming and archive features.
Commercial opportunity	Artists can become part of sponsor-supported campaigns where appropriate.	Brand collaborations and commissioned content.

Artists retain their underlying rights unless a separate agreement is specifically entered into for a particular campaign or use. Any commercial artist partnership should be documented separately.

6. Sponsor & Brand Proposition

The sponsor proposition is based on **association, integration and relevance** rather than simply placing an advertisement beside music.

Partnership	Description	Example deliverables
Station Partner	Ongoing association with VIX 94'.	Website branding, partner acknowledgement, campaign visibility.
Artist Partner	Brand supports selected independent artists.	Artist campaign, content integration, release support.
Show / Mix Partner	Brand presents a recurring programming format.	Named mix/session, landing page, social/content assets.
Release Partner	Brand supports a specific music release.	Launch campaign, artist content, digital placement.
Cultural Partner	Brand aligns with music and creative culture.	Event/content collaboration, curated experiences.
Custom Takeover	Bespoke campaign built around a commercial objective.	Custom creative, exclusive window, integrated activation.

The commercial objective is to make the sponsor feel **part of the VIX 94' experience**, while protecting the credibility of the music platform.

7. Sponsor Partnership Workflow

Stage	Activity	Output
01 — Brief	Understand brand objective, audience, campaign timing and budget.	Partnership brief.
02 — Concept	Match objective to VIX 94' inventory and music/culture opportunity.	Partnership concept.
03 — Proposal	Define placements, content, artists, duration and deliverables.	Commercial proposal.
04 — Agreement	Confirm commercial terms, approvals, usage rights and responsibilities.	Signed partnership agreement.
05 — Production	Create required assets and coordinate artists / programming.	Campaign-ready assets.
06 — Launch	Activate campaign across agreed VIX 94' touchpoints.	Live partnership.
07 — Reporting	Report agreed deliverables and available platform data.	Campaign report.

Exact deliverables should be tailored to the sponsor. Audience or performance numbers should only be presented when supported by verified platform analytics.

8. Investor Proposition

An early-stage platform opportunity built around music, media and culture.

The investment case is not based on claiming an existing scale that has not yet been verified. It is based on the opportunity to build a recognizable independent music property and then expand the monetization layers around it.

Growth pillar	Development opportunity	Strategic value
Audience	Grow recurring listeners and direct traffic.	Creates the base for future monetization.
Artist network	Increase quality and breadth of independent catalogue.	Strengthens discovery proposition.
Brand partnerships	Develop recurring sponsorship relationships.	Creates commercial revenue.
Content	Build mixes, sessions, interviews and original formats.	Creates additional inventory and identity.
Events	Develop physical or hybrid music experiences.	Extends brand and revenue opportunities.
Distribution	Explore additional digital platforms and channels.	Increases reach and reduces dependence on one channel.

9. Potential Business Model

VIX 94' can develop a diversified commercial model rather than relying on a single revenue source.

Revenue stream	Description	Maturity
Sponsorship	Station, show, artist and campaign partnerships.	Near-term
Branded content	Custom content produced with brands and artists.	Near-term / growth
Artist campaigns	Release and promotional partnerships.	Growth
Original programming	Sponsored or standalone shows, mixes and sessions.	Growth
Events	Music-led events and cultural activations.	Longer-term
Strategic partnerships	Media, platform and distribution relationships.	Ongoing

Important: this is a proposed commercial framework, not a projection of current revenue. Pricing and financial forecasts should be developed after verified audience, traffic and operating-cost data are available.

10. Platform Ecosystem

The long-term model can be visualized as a loop in which every stakeholder strengthens the others.

Input	Platform activity	Output
Artists + music	Curation and programming	More compelling catalogue
Catalogue + programming	Listener discovery	Audience growth
Audience + cultural identity	Sponsor proposition	Commercial partnerships
Sponsor funding	Artist / content / platform investment	More programming and visibility
Content + artists + audience	Events and collaborations	Stronger cultural brand

This creates a potential flywheel: better music → better discovery → stronger audience → stronger partnerships → more resources for music and content.

11. Growth & Go-To-Market Workflow

Phase	Primary objective	Key activities
Phase 1 — Foundation	Build a reliable listening product.	Player, catalogue, technical stability, brand identity.
Phase 2 — Artist Growth	Expand quality independent catalogue.	Artist outreach, submissions, curation, programming.
Phase 3 — Audience Growth	Increase recurring listening.	Social content, collaborations, referral mechanisms, editorial programming.
Phase 4 — Sponsorship	Convert platform identity into partnerships.	Sponsor outreach, packages, campaign pilots.
Phase 5 — Expansion	Add new content and commercial formats.	Shows, sessions, events, strategic distribution.

12. Key Performance Indicators

The following metrics can be used to manage the platform. They should be tracked consistently before being presented to investors or sponsors.

Area	Indicative KPI
Audience	Unique listeners, sessions, returning listeners
Listening	Total plays, listening duration, completion / drop-off where available
Artists	Artists onboarded, tracks selected, track rotations
Engagement	Clicks, shares, follows, campaign interactions
Commercial	Sponsors acquired, campaign value, renewals
Content	Shows, mixes, sessions and releases published
Retention	Returning listener rate and repeat sessions

A future investor deck should add verified historical data, monthly trends, acquisition cost, operating costs and revenue once sufficient data exists.

13. Partnership Structures

Partner type	What they contribute	What VIX 94' can provide
Independent Artist	Music, participation, promotional assets where applicable.	Discovery platform, programming, potential campaign opportunities.
Sponsor / Brand	Budget, campaign objective and brand assets.	Music/culture environment, campaign inventory and integration.

Partner type	What they contribute	What VIX 94' can provide
Investor	Capital, strategic expertise, network or distribution.	Participation in platform growth and future commercial expansion.
Media / Distribution Partner	Audience access, distribution or promotional support.	Music programming, original content and partnership inventory.

Final rights, commercial terms, exclusivity, artist approvals and deliverables should be agreed individually for each partnership.

14. Closing Proposition

VIX 94' is designed to become more than an online music player. It is a platform concept built around **independent music discovery, curated listening and cultural partnerships**.

For artists, it creates another route to discovery. For listeners, it creates a focused destination for music. For sponsors, it creates a credible environment to participate in music culture. For investors, it creates the possibility of building a broader independent music and media ecosystem.
